

**Viton**<sup>®</sup> fluoroelastomer

A Product of DuPont Dow Elastomers

## How Do You Know You're Getting Viton<sup>®</sup>

Look For The Seal of  
Genuine Viton<sup>®</sup>

### What Does the Seal Mean?

Only parts made with 100% virgin Viton fluoroelastomer as the sole elastomeric component can be labeled with our seal. These parts have been *manufactured* and *distributed* in accordance with strict guidelines established by DuPont Dow Elastomers, the only manufacturer of Viton fluoroelastomer. Each licensee has signed a formal agreement with DuPont Dow Elastomers and is subject to inspection and audit.

### Why Do I Need It?

The reputation of fluoroelastomer parts has been established by years of proven performance and reliability. You must make sure the parts you receive are equally reputable. Fluoroelastomer compounds can be adjusted to alter properties, cost, and performance. Some suppliers offer blends of fluoroelastomers and non-fluorinated rubbers that are inferior to 100% fluoroelastomer in fluids and heat resistance. Some suppliers get their parts or material from uncontrolled sources with limited knowledge of

the elastomer used or the quality of the compound. To avoid getting an unknown and to assure performance to your specification:

1. Ask for a Certificate of Authenticity or Conformance stating your part(s) are based on 100% virgin Viton from DuPont Dow **or**
2. Insist that your part has a Genuine Viton Seal!  
It's easy!

When you're sure you're getting Genuine Viton, compliance to OSHA 1910.119 (Mechanical Integrity Section) is assured.

### ***How do I get Parts made with Genuine Viton?***

A select group of high quality manufacturers and distributors participate in our Genuine Viton Program. In the U.S. call us at (800) 452-1454 for the name of your closest licensed supplier.
